Management Commentary

"During the third quarter, our global growth trends continued and we made good progress with our key product and new market initiatives," commented Gregory L. Probert, Chairman and Chief Executive Officer. "We achieved our 9th consecutive quarter of growth in both NSP United States and NSP Canada and continue to focus on the expansion of our patent-pending IN.FORM program. Synergy WorldWide once again delivered strong results, led by double-digit growth at Synergy Asia Pacific and further improvements in Synergy Europe. The recent launch of Elite Health in Europe, to be followed by further introductions in Asia in coming quarters, positions us well for further growth across our key Synergy WorldWide markets."

Mr. Probert continued, "Development of our new market opportunity in China continues as we build the infrastructure in anticipation of our direct selling license being issued. Our product innovations and new market investments have us well-positioned for a strong finish to 2016 with the foundation for future growth."

Non-GAAP Financial Measures

The Company has included information which has not been prepared in accordance with generally accepted accounting principles (GAAP), such as information concerning Adjusted EBITDA and net sales excluding the impact of foreign currency exchange fluctuations. Management utilizes the non-GAAP measure Adjusted EBITDA in the evaluation of its operations and believes that this measure is a useful indicator of the Company's ability to fund its business. This non-GAAP financial measure should not be considered as an alternative to, or more meaningful than, U.S. GAAP net income as an indicator of the Company's operating performance. Moreover, Adjusted EBITDA, as presented by the Company, may not be comparable to similarly titled measures reported by other companies.

In addition, the Company believes presenting the impact of foreign currency fluctuations is useful to investors because it allows a more meaningful comparison of net sales of its foreign operations from period to period. Net sales excluding the impact of foreign currency fluctuations should not be considered in isolation or as an alternative to net sales in U.S. dollar measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.

Other companies may use the same or similarly named measures, but exclude different items, which may not provide investors with a comparable view of Nature's Sunshine Products' performance in relation to other companies. The Company has included a reconciliation of Adjusted EBITDA to net income, the most comparable GAAP measure, in the attached financial tables.
